Dear Mr. I Made Riyan Adi Nugroho:

Information about your paper #1570663845 (Secure Electronic Document with QR Code and RSA Digital Signature Algorithm) for iCAST 2020 was changed by I Made Riyan Adi Nugroho ():

Abstract: Falsification of electronic documents has become a challenge in these modern days. Lack of security is a factor in the occurrence of falsification of electronic documents. There are several methods have been founded which can be used to solve these problems, one of which is digital signature. However, most existing digital signature use insecure data format and encryption is rarely used. In this paper, we propose a Secure Electronic Document (SeED) model by adding QR Code and Digital Signature that are encrypted with RSA (Rivest, Shamir and Adleman) algorithm. We implemented the proposed SeED model in a website-based population data processing system and showed that the system is effective for generating electronic documents and validating them more securely.

No further action is required from you.
