> *** Presentation Criteria: Rate the presentation of this paper. (eg. Title: Is it adequate and appropriate for the content of the article? Abstract: Does it contain the essential information of the article? Is it complete? Is it suitable for inclusion by itself in an abstracting service? Diagrams, figures, tables, and captions: Are they essential and clear? Text and mathematics: Are they brief but still clear? If you recommend shortening, please suggest what should be omitted. Conclusion: Does the paper contain a carefully written conclusion, summarizing what has been learned and why it is interesting and useful?)

An introduction should announce the topic; provide context and a rationale of the work. The rationale should clearly and concisely indicate the value of the paper and its contribution to the field. Provide an overview of the structure of the body of the paper in the introduction.

The literature review must be defined by a guiding concept. It is not just a descriptive list of the material available or a set of summaries. The purpose is to convey to the reader what knowledge and ideas have been established on a topic, and what their strengths and weaknesses are. The author is suggested to work in this point.
