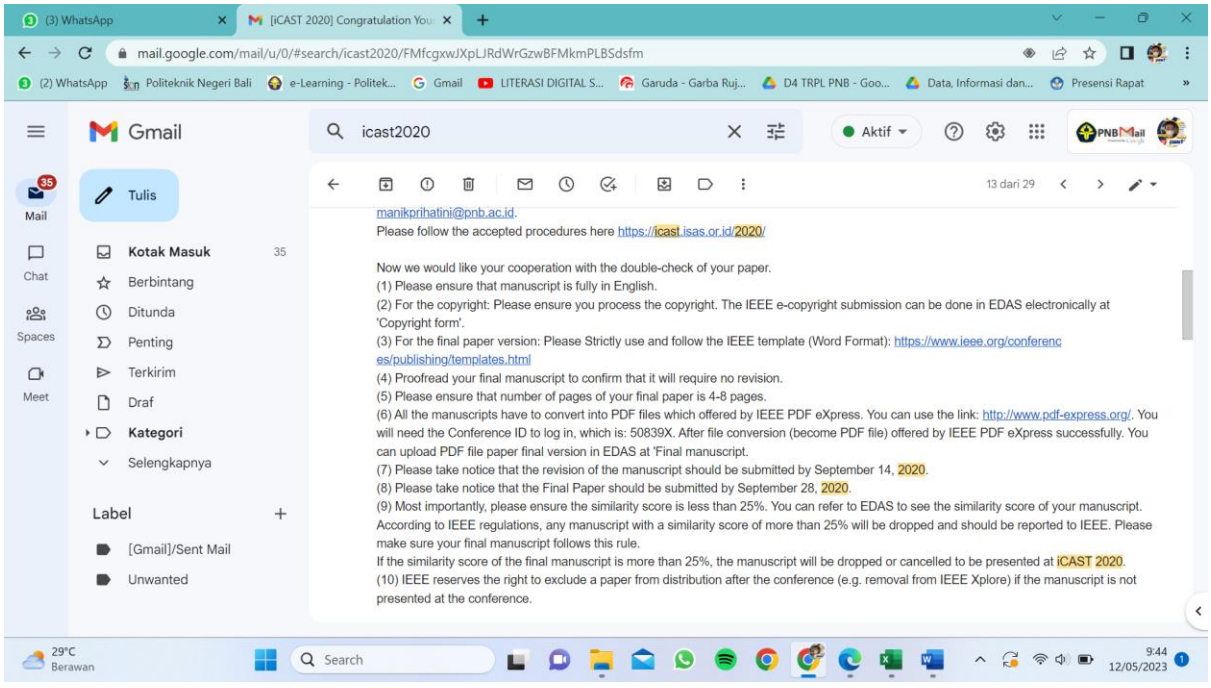
Dear Dr. Putu Manik Prihatini:

Congratulations - We are pleased to inform you that your manuscript #1570662792 ('Feature Extraction Performance on Classified Methods for Text Sentiment Analysis') has now been CONDITIONAL ACCEPTED by 2020 International Conference on Applied Science and Technology (ICAST).

The evaluation of your paper and all comments from reviewers of your paper are enclosed with this message.

The reviews are below or can be found at https://edas.info/showPaper.php?m=1570662792 using your EDAS login name manikprihatini@pnb.ac.id.
Please follow the accepted procedures here https://icast.isas.or.id/2020/



manikprihatini@pnb.ac.id.
Please follow the accepted procedures here https://icast.isas.or.id/2020/

Now we would like your cooperation with the double-check of your paper.
(1) Please ensure that manuscript is fully in English.
(2) For the copyright: Please ensure you process the copyright. The IEEE e-copyright submission can be done in EDAS electronically at 'Copyright form'.
(3) For the final paper version: Please Strictly use and follow the IEEE template (Word Format): https://www.ieee.org/conferences/publishing/templates.html
(4) Proofread your final manuscript to confirm that it will require no revision.
(5) Please ensure that number of pages of your final paper is 4-8 pages.
(6) All the manuscripts have to convert into PDF files which offered by IEEE PDF eXpress. You can use the link: http://www.pdf-express.org/. You will need the Conference ID to log in, which is: 50839X. After file conversion (become PDF file) offered by IEEE PDF eXpress successfully. You can upload PDF file paper final version in EDAS at 'Final manuscript.
(7) Please take notice that the revision of the manuscript should be submitted by September 14, 2020.
(8) Please take notice that the Final Paper should be submitted by September 28, 2020.
(9) Most importantly, please ensure the similarity score is less than 25%. You can refer to EDAS to see the similarity score of your manuscript. According to IEEE regulations, any manuscript with a similarity score of more than 25% will be dropped and should be reported to IEEE. Please make sure your final manuscript follows this rule.
If the similarity score of the final manuscript is more than 25%, the manuscript will be dropped or cancelled to be presented at iCAST 2020.
(10) IEEE reserves the right to exclude a paper from distribution after the conference (e.g. removal from IEEE Xplore) if the manuscript is not presented at the conference.

presented at the conference.
We, iCAST 2020 organizer, are now planning the detailed program and will inform you in coming weeks the information related to iCAST 2020
We are looking forward to seeing you in Padang-Indonesia via online conference, on October 24-25, 2020.
Sincerely Yours,
Regards,
Dr. Yuhefizar, S.Kom.,M.Kom
Conference Chair

This paper proposes a sentiment analysis for hotel's service quality using TF-IDF method that is evaluated using five classification techniques. Data was taken from the previous customer reviews. The idea of implementing this analytic is good since we usually can only imagine the hotel's service quality from its number of star and must read one by one previous customer reviews. By using this analytic application, we directly get a description about the service's quality. However, the presentation of the paper is less detail. Many information was missing, such as the parameters that were set for each classification technique. For example: what type of SVM did the author use in the experiment? What about the c value? Etc.

This paper proposes a sentiment analysis for hotel's service quality using TF-IDF method that is evaluated using five classification techniques. Data was taken from the previous customer reviews. The idea of implementing this analytic is good since we usually can only imagine the hotel's service quality from its number of star and must read one by one previous customer reviews. By using this analytic application, we directly get a description about the service's quality. However, the presentation of the paper is less detail. Many information was missing, such as the parameters that were set for each classification technique. For example: what type of SVM did the author use in the experiment? What about the c value? Etc.
Another thing that is quite disturbing is the reason why the author compared the five classification techniques is not strong enough. Because the author compares the five classification techniques only for his own proposed method. Supposedly, the proposed method needs to be compared with other methods (other than TF-IDF).
It is better if the cited references are sorted according to the first cited reference, followed by the second cited reference, etc.

To all authors and participants
International Conference on Applied Science and Technology (iCAST) 2021.

Thank you for your participation in ICAST 2021.
All papers presented at ICAST 2021 will be sent to Publisher ScitePress - https://www.scitepress.org (for ICAST-ES Engineering Science) and Publisher Atlantis-Press - https://www.atlantis-press.com/ (for ICAST-SS Social Science). Publisher will determine which paper will be published. If there is a paper that is not accepted by the publisher, the ICAST committee will give the author a choice: whether the paper is withdrawn by the author or willing to be published by the ICAST committee in ICAST proceedings (proceeding books will be given an ISBN and published at https://proceeding.icast.isas .or.id/ ; the registration fee cannot be withdrawn because it has become part of the payment for the organizing of the 2021 ICAST Seminar activity.

Thank you.
