You can send your revised paper by reply this email. Please immediately repair and send the paper **before August 31, 2018**. You should pay attention to:

1. Authors should have made substantial contributions to:

- (a) The conception and design of the study, or acquisition of data, or analysis and interpretation of data
- (b) Drafting the article or revising it critically for important intellectual content

2. Introduction section

Explain the context of the study and state the precise objective

An Introduction should contain the following three parts:

- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about.

- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it.

So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.
